Web 2.0 and Web 3.0 (Semantic Web) - Web Technology Unit 1 Welcome to  
"Semantic Web Technologies" [A story about the Semantic Web](#) Von Web 2.0 zu  
Web 3.0 Web 2.0 Semantic Web

There are differences, of course: Semantic Web is like Web 2.0 (in this respect) but  
with more general, standardized, and possibly more expressive data models. In  
some cases problem may get really hard and needs inferences, reasoning services;  
but Web 2.0 will be able to seamlessly “upshift” to RDF Schemas, SKOS, OWL, or  
Rules, making use of the greater expressibility of those technologies.

Talking Points for Semantic Web vs. Web2.0

Web 2.0 describes the trend in Web technology and design that aims to enhance

Web 2.0 & Semantic Web (Annals of Information Systems ...

Where Web 2.0 is focused on people, the Semantic Web is focused on machines. The Web requires a human operator, using computer systems to perform the tasks required to find, search and aggregate its information. It's impossible for a computer to do these tasks without human guidance because Web pages are specifically designed for human readers.

What Is the Semantic Web? - Webopedia.com

According to the W3C Semantic Web Activity [1]: The Semantic Web provides a common framework that allows data to be shared and reused across application, enterprise, and community boundaries. This statement clearly explains that the Semantic Web is about data sharing. Currently, the Web uses hyperlinks to connect

Web 2.0, term devised to differentiate the post-dotcom bubble World Wide Web with its emphasis on social networking, content generated by users, and cloud computing from that which came before. The 2.0 appellation is used in analogy with common computer software naming conventions to indicate a new, improved version.

Web 2.0 | Definition & Examples | Britannica

Web 2.0 Is an Interactive Internet These ideas of bringing the power of people directly into the internet wouldn't be possible without the technology to support it. For the collective knowledge of people to be harnessed, websites must be easy enough to use that they don't stand in the way of people using the internet to share their knowledge.

What Is Web 2.0 and How Has It Changed the Internet?

Web 2.0 refers to world wide website which highlight user-generated content, usability and interoperability for end users. Web 2.0 is also called participative social web. It does not refer to a modification to any technical specification, but to modify in the way Web pages are designed and used.
