Why Buildings Fall

Down are in the end very human ones, tales of the interaction of people and nature, of architects, engineers, builders, materials, and natural forces all coming together in sometimes dramatic (and always instructive) ways.

through the nervous system of its electric wires. A building reacts to changes in its outer or inner conditions through its brain of feed-back systems, is protected by the skin of its facade, supported by the skeleton of its columns, beams, and slabs, and rests on the feet of its foundations. Like most
