coats. According to weather folklore, the more black on a woolly worm in the fall means a longer, colder, and possibly snowier winter,...

Spotted! Woolly worms are here and so is their winter ...

Can woolly worms predict the weather? Woolly worms are a tiger moth caterpillar. Legend has it that they can determine if the coming winter will be mild or harsh. Woolly worms, also known as woolly bears, have a black band at each end with a band of reddish brown in the middle. Folk wisdom states that if the brown bands on the woolly worms are ...

Woolly Worm Weather | Simply Appalachian

Woolly bear caterpillars—also called woolly worms—have a reputation for being able to forecast the coming winter weather. If their rusty band is wide, then it will be a mild winter. The more black there is, the more severe the winter. Just how true is this weather lore?

Most people in the Midwest or New England have heard at one time
or another that if you want a forecast for the upcoming winter that
you should just look for a woolly bear (black at both ends and a
reddish brown or rust colored in the middle) or fuzzy bear
caterpillar. This same caterpillar is called the woolly worm in
southern United States.
