Implementing a Zero Accident Vision: 4 pillars of success. 13 minute read | 23 May 2017 13:47:27 BST. Zero Accident Vision (ZAV) is a viewpoint stating that no one ought to be injured as the result of an accident in the workplace. More a school of thought than an actual numerical goal, in accident prevention terms, Zero Accident Vision proposes that all accidents can be prevented and offers a basis for learning from accidents and improving processes should they occur.

Looking at those statistics another way, there were, on average, over 10,000 injuries a day in U.S. workplaces and 14 deaths per day. If you add in all the accidents in which no one was injured and the near misses that could have been accidents, the numbers are astounding—and disturbing. So many accidents every day.

Zero Accidents: 10 Steps in the Right Direction - EHS ...

"Zero incidents" is the elimination of loss-producing events that result in an injury, property damage, or lost work day case. Management and employees must agree that it is unacceptable for any disabling injuries or lost-workday cases to occur, and their commitment must be demonstrated.

Zero Injuries Is Not Your Goal -- Occupational Health & Safety

When the goal, programs and process are based on zero incidents, this translates as zero failures, thus promoting the mentality: Don't fail. Of course we do not want people to fail, but is this the motivation we truly desire: "Work hard to not fail?" When organizations establish Zero Incidents Injuries, this frames: Safety Excellence=Zero Incidents.

Zero Incident Goals Motivate Risk-Taking, Not Excellence

Zero Injuries

Zero Accident Vision is a philosophy which states that nobody should be injured due to an accident. It is more a way of thinking rather than a numerical goal; In terms of accident prevention strategies, Zero Accident Vision can be viewed as a way of thinking; this proposes that all accidents can be prevented.

Zero accident vision - OSHWiki

Pull the number of accidents and recordable incidents from the OSHA 300 log. The OSHA 300 log is what you use to record workplace injuries. In that log is a table where you record incidents. Simply count the number of lines that you've filled out in that table to determine the number of recordable incidents.

How to Calculate Accident Incident Rate: 10 Steps (with ...

However, figures show that 581,000 workers sustained injuries in 2018/2019, 147 fatally. For most businesses, zero accidents and lost working days is the ultimate goal. While this may seem like an impossible objective for most organisations, it still remains the goal to aspire to. With 70% of accidents related to temporary works, better contractor management may have the biggest impact on achieving 'target zero'.
