The 7-speed manual transmission is the first manual transmission with 7 gears that is available for passenger cars. It was created based on the 7-speed dual clutch transmission by ZF. The 7MT is responsible for the new, fast gear shifting characteristics. The developed converted shifting actuator allows a classic H-shift pattern to be combined with dual-clutch gear sets.

For automated manual transmissions, the clutch is opened by an electromechanical clutch actuator. After the clutch is opened, the shift operations within the gearbox are taken over by an electromechanical transmission actuator. These two actuators are controlled by an electronic control unit. ZF is a single-source supplier and integrator for all the components including the transmission control unit and software.
